Verizon 5G Solutions Brief

Verizon 5G Business Internet¹

Welcome to the future of internet.
Ultra-fast. Ultra-powerful.

Internet connectivity: Next-gen possibility

Your business demands not just reliable connectivity, but internet that opens the door to next-gen innovation. Verizon 5G Business Internet unlocks the door to transformative 5G uses with its performance and reliability.

Verizon 5G Business Internet is a high-speed, fixed wireless access service that is paving the way for a new era of business innovation with speeds and capacity to connect many devices, giving your organization a powerful tool to help stay competitive. Delivered on Verizon's 5G Ultra Wideband network, 5G Business Internet is faster than 4G LTE, connecting your organization to the internet with unlimited data and no annual service contracts.

Many benefits, innovation ready

5G Business Internet is ideal as either a primary or backup connectivity service. It's perfect for enabling new branches or locations, with a short lead time from order to install. Best of all, 5G Business Internet uses the 5G Ultra Wideband for 5G speed and performance.

Verizon's investment in critical spectrum holdings facilitates a powerful 5G Ultra Wideband experience and high performance.

Next-generation speed

Welcome to internet speeds that are ultra-fast. With Verizon 5G Business Internet, you can choose from three speed tiers, with our fastest tier offering download speeds of up to 400 Mbps. Meet colleagues by video conference to collaborate smoothly in real time. Plus, our plans offer unlimited data.

Get an unprecedented 10-year price lock² so you can grow your business, not your costs.

Get 5G Business Internet. Level up your connection.

Easy and dependable

- Professional installation or plug-and-play (self-setup) options available depending on speed tier
- Great solution for primary or business continuity (backup) internet connectivity
- Strong built-in network security controls

Speed and performance

- Unlimited data
- Massive capacity
- Next-generation speed

Innovation ready

- Platform for advanced features and new organizational outcomes
- Become an early adopter of next-gen network technology

5G built right

- From a business partner with award-winning network performance

The benefits of 5G Business Internet

Simple, reliable internet

Choose a custom installation by a partner—Verizon—or the self-setup plug-and-play option.

Business continuity

Keep your organization going with 5G Business Internet as a primary or backup internet connection.

Branch office connectivity

Quickly connect new locations as your business grows, made simple with Verizon's professional installation or easy plug-and-play self-setup option.

Evolution into a real-time-enterprise

5G Business Internet begins your path to the transformative 5G ecosystem with speeds and performance that enhance video streaming, video surveillance and other next-gen use cases.

You'll have the connectivity to leverage transformative technologies as the 5G ecosystem continues to evolve.

Digital transformation

With Verizon 5G Business Internet, you can prepare your infrastructure to leverage transformative technologies such as 5G Edge. This technology is a great first-step into the 5G ecosystem, positioning your organization to introduce next-gen tools to drive true business change, through use cases like augmented reality (AR) and virtual reality (VR).

5G built right

From a trusted business partner that enables network performance and reliability, empowering mission-critical outcomes. Built on our spectrum and fiber assets, engineered by our team.

Choose the right plan and
guarantee your pricing until 2034.²

\$69/mo
100 Mbps

\$99/mo
200 Mbps

\$199/mo
400 Mbps

Plans reflect maximum available download speeds; these speeds vary and may be lower in the event of network congestion. Upload speeds also vary and will be lower than download speeds. Taxes and fees apply.

Why customers are choosing Verizon Business

Reliability

Verizon was awarded the "Most reliable 5G network in America".¹

Availability

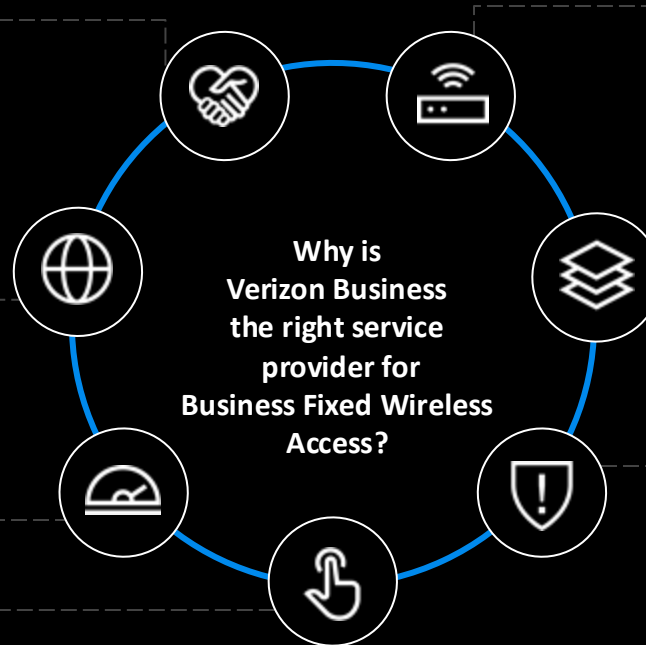

Verizon 4G LTE network available to 99% of the US population² and 5G Business Internet is available to 2M businesses in 900 cities across the domestic US.

Speed options

Both LTE BI and 5G BI offer various speed tiers to fit customers' business requirements and budgets.

Provisioning

Customers can quickly set up their Verizon wireless business service with plug & play self-activation.

Good router placement

Customers can use the Verizon Compass app to determine the optimal placement of their Gateway internet router for receiving the strongest wireless signal at their facilities.

Tiered product strategy

Verizon Business has a portfolio of Security, UCaaS and Managed Services product and partnerships that complement our customers' business internet investments.

Zero-touch security solution

Verizon Business Internet Security is available and features can be activated immediately with nothing to install or configure. And management is clear and intuitive, putting customers in control of their security.

¹ Most reliable 5G network based on more first place rankings in RootMetrics® 5G data reliability assessments of 125 metro markets conducted in 2H 2023. Tested with best commercially available smartphones on three national mobile networks across all available network types. Your experiences may vary. RootMetrics rankings are not an endorsement of Verizon.
